PROFESSIONAL SUMMARY

Software developer and Computer Science student who builds web and mobile apps end to end, from interface to database. Projects include a client's inventory and delivery system and a disaster reporting app, built with Next.js, Flutter, and FastAPI. Seeking a 3 to 4-month software development OJT starting January 2027.

EDUCATION

Biliran Province State University - BS Computer Science **2023 - Present**

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, TypeScript, Dart, PHP, SQL

Frameworks: Flutter, React, Next.js, FastAPI, Django, Tailwind CSS

Data: PostgreSQL, Supabase, PostGIS

Tools: Git, GitHub, Figma, Docker

PROJECTS

ZIREN | Emergency Reporting System | Team Project | 2025 - Present

Tech: Flutter, Next.js, FastAPI, Supabase, NLP

- Led a team of 4 as lead developer and UI/UX designer of a disaster reporting system for Biliran Province.
- Built a FastAPI service that uses NLP to suggest incident type and severity, which responders confirm or correct on a Next.js dashboard.

RM Hardware | Inventory and Delivery System | Client Project | 2026

Tech: Next.js, PostgreSQL, Leaflet

- Built a system that brings a hardware store's inventory, sales, and deliveries into one place, with role-based access for customers, staff, riders, and admins.
- Added low-stock alerts and a live delivery map so staff can restock early and customers can follow orders without calling the store.

Family Feud | Game Show Web App | Commissioned | 2026

Tech: Next.js

- Built a browser-based game show for a school's Student Night, with two teams and an editable question bank.
- Separated host controls from an audience TV display so the game ran live without slides or paper scoring.

Rockalyzer | Rock Identification App | Personal Project | 2024

Tech: Flutter, Machine learning, Google Colab

- Trained an image classifier in Google Colab and built a Flutter app that identifies rocks from photos.
- Displays each result's rock type and confidence score, and saves finds to a personal collection.
